

MEDICATIONS AND ALLERGIES FORM

It is important that Dr Guzman is aware of any medication you take prior to your surgery, as some medications can interfere with the anaesthetic and may cause problems with bleeding during and after surgery.

The medications of greatest concern are blood thinning agents of any type. These include warfarin, aspirin, clopidogrel and iscover amongst many other agents.

If you are taking these or any other medications or supplements, or if you have any allergies, please list these below.

Patient name

Procedure

____ / ____ / ____

Procedure date

Medication	Dose/ Frequency
_____	_____
_____	_____
_____	_____
